SIR:-

I have the honour to submit for your approval the Sixtieth Annual Report made in conformity with and under the provisions of the Act respecting the Registration of Births, Marriages and Deaths in the Province of Ontario, for the year ending December 31st, 1929.

I have the honour to be, Sir,

Your obedient servant,

Deputy Registrar-General.

To the Hon. Forbes Godfrey, Registrar-General of Ontario.

To His Honour the Lieutenant-Governor of the Province of Ontario.

May It Please Your Honour:

I herewith beg to present for your consideration the Sixtieth Annual Report of the Registrar-General, relating to the Registration of Births, Marriages and Deaths in the Province of Ontario during the year 1929.

Respectfully submitted,

FORBES GODFREY,

Registrar-General of Ontario.

REPORT UPON

Births, Deaths and Marriages

FOR THE YEAR 1929

The Sixtieth Report of the Registrar-General for the Province of Ontario, is herewith presented:

POPULATION

The estimated population is 3,271,000, distributed as follows:

| City municipalities | 1,392,223 or 42,56 pe | r cent. |
|--|-----------------------|---------|
| Towns (over 5,000 population) | | |
| Rural (including all other municipalities) | 1,663,860 or 50.87 pe | r cent. |

ESTIMATED POPULATION 1929 BY AGE GROUPS

| | Males | Females | Totals |
|-------------|-----------|-----------|-----------|
| Totals | 1,659,500 | 1,611,800 | 3,271,300 |
| Under 1 | 37,173 | 35,782 | 72,955 |
| 1 | 34,186 | 33,042 | 67,228 |
| 2 | 37,671 | 36,749 | 74,420 |
| 3 | 37,671 | 36,749 | 74,420 |
| 4 | 37,671 | 36,588 | 74,259 |
| 5- 9 | 183,209 | 178,104 | 361,313 |
| 10–14 | 175,907 | 170.045 | 345,952 |
| 15–19 | 168,605 | 166,982 | 335,587 |
| 20-24 | 157,652 | 161.502 | 319,154 |
| 25-29 | 136,577 | 136,681 | 273,258 |
| 30–34 | 117,327 | 114,438 | 231,765 |
| 35–39 | 106,872 | 102,027 | 208,899 |
| 40–44 | 92,434 | 88,327 | 180,761 |
| 45–49 | 79,988 | 74,949 | 154,937 |
| 50-54 | 69,035 | 65,600 | 134,635 |
| 55-59 | 53,768 | 50,127 | 103,895 |
| 60–64 | 47,296 | 43,841 | 91,137 |
| 65–69 | 34,351 | 31,269 | 65,620 |
| 70–74 | 24,560 | 23,048 | 47,608 |
| 75–79 | 15,101 | 14,023 | 29,124 |
| 80–84 | 4,082 | 3,884 | 7,966 |
| 85–89 | 1,493 | 1,514 | 3,007 |
| 90 and over | 531 | 580 | 1,110 |

BIRTHS

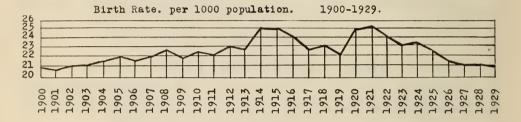

| | | 1929 | | | 1928 | |
|----------|--------|------|-------|--------|------|-------|
| | Number | | Ratio | Number | | Ratio |
| Province | 68,458 | | 20.9 | 68,510 | | 21.2 |
| Cities | | | 23.3 | 31,602 | | 23.6 |
| Towns | 6.288 | | 29.2 | 5,939 | •••• | 27.8 |
| Rural | 29,692 | | 17.8 | 30,969 | | 18.4 |

Of the above, 35,154 were males and 33,304 females, giving a rate of 1,055 males to 1,000 females. The fluctuation in these proportions in a period of twenty years has been from 1,053 to 1,117, with no particular trend excepting in the five years, 1916 to 1920, when there was an increase in masculinity of from 1,063 males in 1916 to 1,117 males in 1920 to 1,000 females.

NUMBER OF BIRTHS AND RATE FOR 10 YEARS

| Year | Number | Ratio Y | ear | Number | Ratio |
|------|--------|---------|-----|--------|-------|
| 1920 | 72,511 | 25.119 | 925 | 70,122 | 22.6 |
| 1921 | 74,152 | 25.319 | 926 | 67,617 | 21.5 |
| 1922 | 71,320 | 23.919 | 927 | 67,671 | 21.2 |
| 1923 | 70,056 | 23.119 | 928 | 68,510 | 21.2 |
| 1924 | 71,510 | 23.319 | 929 | 68,458 | 20.9 |

It will be immediately noted that there has been a decline in the birth rate from the high point (25.3) reached in 1921, and seems to be quite consonant with the birth rate in all other countries.

NATURAL INCREASE BY RATES PER 1,000 OF POPULATION

| Birth Rate | Death Rate | Rate of Natural Increase | Birth Rate | Death Rate | Rate of Natural Increase |
|---------------|---------------|--------------------------------|---------------|---------------|--------------------------------|
| 191022.4 | 12.5 | 9.9 | 192025.1 | 14.0 | 11.1 |
| 191122.2 | 12.6 | 9.6 | 192125.3 | 11.8 | 13.5 |
| 191222.9 | 12.5 | 10.4 | 192223.9 | 11.4 | 12.5 |
| 191322.7 | 13.1 | 9.6 | 192323.1 | 11.8 | 11.3 |
| 191425.0 | 12.2 | 12.8 | 192423.3 | 10.8 | 12.5 |
| 191524.9 | 12.3 | 12.6 | 192522.6 | 10.9 | 11.7 |
| 191623.9 | 13.0 | 10.9 | 192621.5 | 11.4 | 10.1 |
| 191722.6 | 12.0 | 10.6 | 192721.2 | 10.9 | 10.3 |
| 191823.0 | 15.3 | 7.7 | 192821.2 | 11.5 | 9.7 |
| 191922.0 | 11.9 | 10.1 | 192920.9 | 11.7 | 9.2 |

The largest natural increase during the past twenty years was in 1921, when there were 13.5 more births per 1,000 of population than deaths. A high rate was reached in 1914, the year war was declared and it gradually declined during the war years (for the rate in 1918 cannot be considered as at all normal, due to the tremendous number of deaths in that year from influenza). After the armistice and the men began to return the rate increased gradually until the high mark of 13.5 was reached in 1921. From this point a gradual decline is indicated until what might be considered a normal rate was again established. The rates in the last quinquennial of the period agree approximately with those in the first quinquennial.

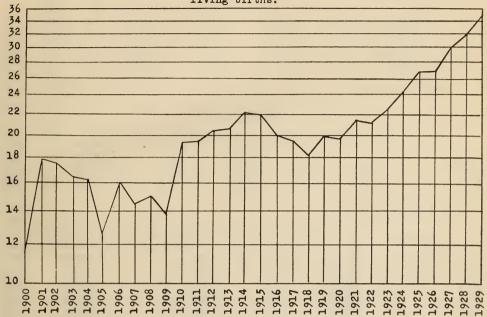

ILLEGITIMATE BIRTHS

Rate per 1,000 living births

| 1900 12.5 1908 14.9 1901 17.7 1909 13.7 1902 17.5 1910 19.3 1903 16.4 1911 19.4 1904 16.2 1912 21.3 1905 12.5 1913 21.6 1906 15.9 1914 22.1 1907 14.4 | $\begin{array}{cccccccccccccccccccccccccccccccccccc$ | 1923 |
|---|--|------|
|---|--|------|

The above table indicates a steady rise in the rates of illegitimacy in the Province. It has almost trebled in the 30 years shown in above table. The increase in 1929 over the rate of 1928 is the greatest in nineteen years. The admitted freedom exercised between the sexes during the last several years may in some measure be responsible. In the first decade shown above the increase was 9.5%. In the second decade the increase was 44.5%. In the third decade 75.2%.

STILL-BIRTHS

| ** | Registered | Ratio per 1,000 |
|------|-----------------------|---------------------|
| Year | as Births | total Births |
| 1920 | 2.49.5 | 33.3 |
| 1921 | 3,234 | 40.9 |
| 1922 | 3,115 | 41.8 |
| 1923 | 3.028 | 41.4 |
| 1924 | 2.594 | 34.9 |
| 1925 | 2,780 | 38.1 |
| 1926 | 2.812 | 39.9 |
| 1927 | $\frac{2,312}{2.758}$ | $\frac{39.9}{39.2}$ |
| 1928 | $\frac{2,793}{2.793}$ | |
| 1020 | | 39.2 |
| 1929 | 2,730 | 38.3 |

PLURAL BIRTHS CLASSIFIED TO SHOW NUMBER OF CHILDREN BORN ALIVE AND STILLBORN BY SEX, 1929

| CLASSIFICATION OF BIRTHS | Ontario |
|--|---------|
| Cases of twins: | 821 |
| I wo males (both living) | 999 |
| One male and one female (both living) | 280 |
| I WO TELLIATES (DOTH HVING) | 222 |
| One male living and one male stillborn | 23 |
| One male living and one temale stillborn | 5 |
| One male stillborn and one female living | 17 |
| One female living and one female stillborn | 99 |
| I Wo males (both stillborn) | 10 |
| One male and one temale (both stillborn) | 7 |
| I wo remaies (both stillborn) | 6 |
| Cases of triplets | 10 |
| Inree males (all living) | 7 |
| I WO IBales and one temple (all living) | 1 |
| One male and two females (all living) | 1 |
| Three remaies (all living) | 5 |
| Two males living and one male stillborn | 2 |
| | |

| Total multiple births | No. | 831 |
|----------------------------|----------|------------------|
| | M. F. | 833 839 |
| Total single living births | No. | 66,901 |
| | | 34,390 32,511 |
| Total single stillbirths | No. | 2,615 |
| | M. F. | 1,478 1,137 |
| Total confinements | 1 , | 70,347 |

MARRIAGES

| | 1929 | | | 1928 | |
|-------------|------|-------|--------|------|-------|
| Number | | Ratio | Number | | Ratio |
| Province | | 8.4 | 25,728 | •••• | 8.0 |
| Cities | | | 15,242 | | 11.4 |
| Towns | | | 2,112 | | |
| Rural 8,641 | | 5.2 | 8,374 | | 4.9 |

See Tables 12 to 18.

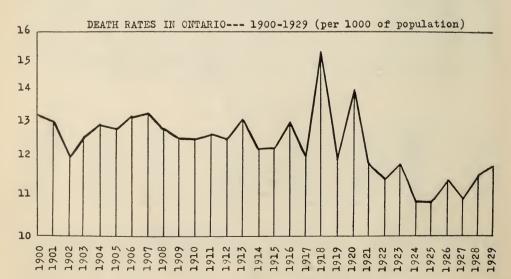

NUMBER AND RATIO PER 1,000 POPULATION FOR 10 YEARS

| Year | Marriages | Ratio | Year | Marriages | Ratio |
|------|-----------|-------|------|-----------|-------|
| 1920 | 29,104 | 10.0 | 1925 | 23,074 | 7.4 |
| 1921 | 24,871 | 8.5 | 1926 | 23,632 | 7.5 |
| 1922 | 23,360 | 7.8 | 1927 | 24,677 | 7.7 |
| 1923 | 24,842 | 8.2 | 1928 | 25,728 | 8.0 |
| 1924 | 24.038 | 7.8 | 1929 | 27,605 | 8.4 |

The marriage rate remains fairly steady, the fluctuations from year to year being comparatively small and showing no decided trend to rise or decline.

DEATHS

| | | 1929 | | | 1928 | | | | |
|----------|--------|------|-------|--------|------|-------|--|--|--|

| | | | 22.2 | | | | | | | | |

The above table shows the ten highest causes of death and these account for 25,587 of all deaths, or 67.2%. Increased rates are indicated in four, viz.: Organic Heart Diseases, Influenza, Diseases of the Arteries, and Infantile Diarrhoea. Decreases occurred in Pneumonia, Tuberculosis, Cancer, Accidental and other external causes, and Apoplexy, and no change worth noting in the rate of Bright's Disease.

There is indicated a slight decline in the death rate from Cancer this year. In 1928, it was 106.5, and this year is 104.0 per 100,000 of population. The last drop was in 1925, when it fell 1.1 in the hundred thousand and there is no reason to believe that the drop this year will be maintained. There are fluctuations in the rate of each type of cancer classification, the greatest of which is in cancer of the stomach. Here the decline is 2.5, agreeing with the decline in the whole class. This is a drop of 2.5 in the rate.

Tuberculosis is down to eighth place and is at the lowest point ever reached. The rate is 52.0 per 100,000 of population and is 9% of a decline. The rate for 1929 was only two-thirds the rate of 1919, a reduction of 50%. This is substantial evidence proving the benefit derived from the efforts put forward by health authorities to exterminate the White Plague, as it was at one time popularly known.

INFANT MORTALITY

DEATHS OF CHILDREN UNDER ONE YEAR-PRINCIPAL CAUSES OF DEATH

CANCER

There were 39 fewer deaths from cancer in 1929 which, with the normal increase in population, brought the death rate down by 2.5. This, while not the first decline in the rate, it is the first time since 1918 that the actual number of deaths reported has been lower.

Table showing the distribution of deaths from various types according to class and rates per 100,000 of population as follows:—

| | 19 | 20 | 19 | 21 | 19 | 22 | 19 | 23 | 19 | 24 | 19 |)25 | 19 |)26 | 19 | 27 | 19 | 928 | 19 | 929 |

The foregoing Table shows the death rates by age groups. It is interesting to note in the five years shown how consistently the female rate exceeds the male up to about the end of the sixties, when the rate is higher among the males.

MATERNAL MORTALITY

Province—368, being 5.18 deaths per 1,000 births.* Cities and towns—262, being 6.48 deaths per 1,000 births. Rural—106, being 2.62 deaths per 1,000 births. *Still-births included.

Death rates from automobiles, per 100,000 population.

RIGHT index for organic Heart and cancer death rates.

The above graph shows the death rates from automotive accidents compared with the rates from deaths from organic heart diseases and cancer.

For years it has been an appalling fact that these two causes have been responsible for a very large proportion of deaths (between 24% and 25% of all deaths) in our province and with a steadily increasing rate.

Although deaths from automotive vehicles have been few in number when compared with the huge totals piled up by cancer, organic heart, or tuberculosis, and the rates consequently lower, the fact is that the rate of deaths from automotive accidents is increasing by leaps and bounds.
